

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. – 2. (Cancelled)
3. (Currently Amended) A consumer tote as claimed in claim 149, wherein:
the exterior is formed from a non-metallic textile.
4. (Currently Amended) A consumer tote as claimed in claim 149, wherein:
the core is supported at each end by a molding having a hub which engages the core.
5. (Original) A consumer tote as claimed in claim 4, wherein:
each hub surrounded by a bearing surface which locates the hub in a respective access opening.
6. (Original) A consumer tote as claimed in claim 5, wherein:
the bearing surface makes contact with an inside bottom surface of the disposable exterior when the hub is located in the openings.
7. (Original) A consumer tote as claimed in claim 6, wherein:
the bearing surface is circular and connected to the hub by spokes.
8. (Original) A consumer tote as claimed in claim 4, wherein:
at least one hub has an external coupling for engaging a rotating winding spindle.
9. (Original) A consumer tote as claimed in claim 8, wherein:
the coupling comprises a ring of teeth.
10. (Currently Amended) A consumer tote as claimed in claim 149, further comprising:
a handle which folds flat against the exterior.
11. (Original) A consumer tote as claimed in claim 10, wherein:

the handle is formed by two similar sub-units which fold from a flat position to a cooperating position in which a handle opening in each sub-unit align to form a grip.

12. (Original) A consumer tote as claimed in claim 11, wherein:
there is formed a gap between the access flap and an adjacent edge of the exterior, when the flap is closed; and
each sub-unit has an edge which is affixed to the exterior, adjacent to the gap;
the sub-units arranged in a mirror image relationship about the gap.

13. (Currently Amended) A consumer tote as claimed in claim 149, further comprising:
one of the access openings exposes a coupling formed on a hub which carries the core; and
a visible marker is located on the exterior for indicating the location of the coupling.

14. (Currently Amended) A consumer tote as claimed in claim 149, wherein:
the exterior is dimensioned to fit between the loading spindles of a wallpaper printing machine.

15. (Currently Amended) A consumer tote as claimed in claim 149, wherein:
the exterior further comprises a viewing window.

16. (Currently Amended) A consumer tote as claimed in claim 149, wherein:
the exterior is adapted to hold about 50 meters of wallpaper wound onto a core.

17. (Original) A consumer tote as claimed in claim 2, wherein:
the adjacent edge includes a return lip.

18. (Original) A consumer tote as claimed in claim 2, wherein:
the core is supported at each end by a molding having a hub which engages the core.

19. (Original) A consumer tote as claimed in claim 18, wherein:
each hub surrounded by a bearing surface which locates the hub in a respective access opening.

20. - 48. (Cancelled)

49. (New) A consumer tote for a roll of wallpaper, the tote comprising:
a disposable exterior in which is formed a main access flap and a pair of core access
openings; and
the tote having an interior in which is located a disposable core which is aligned with the
access openings; wherein,
the access flap is hinged for rotating between an open position allowing user access
to the disposable core and a closed position restricting access to a gap formed between the
access flap and an adjacent edge of the exterior.
